Art through ICT at Hautes Capelles Infant School

We are going to learn….

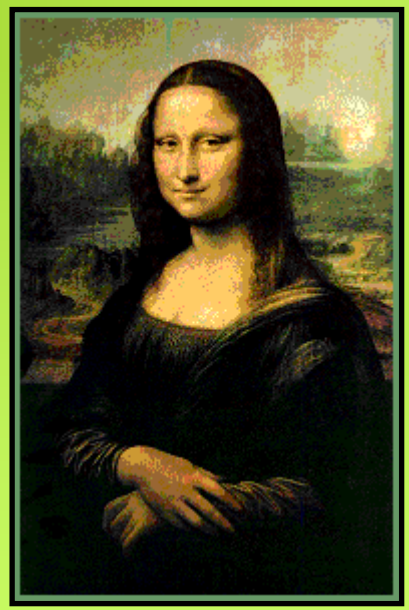
About portraits that have been painted by famous artists.

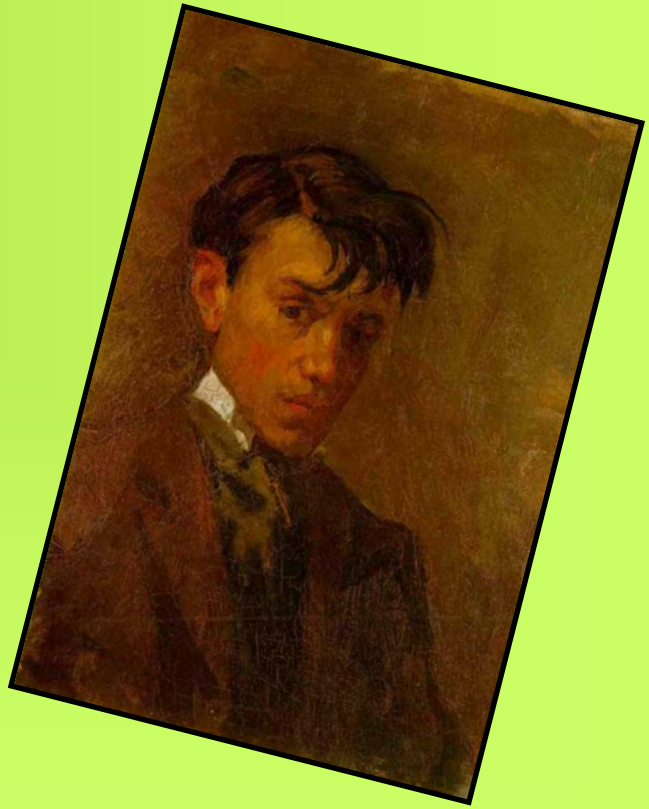
To use the digital camera

o use art software to paint a self portrait.

To use art software to change the way we look.

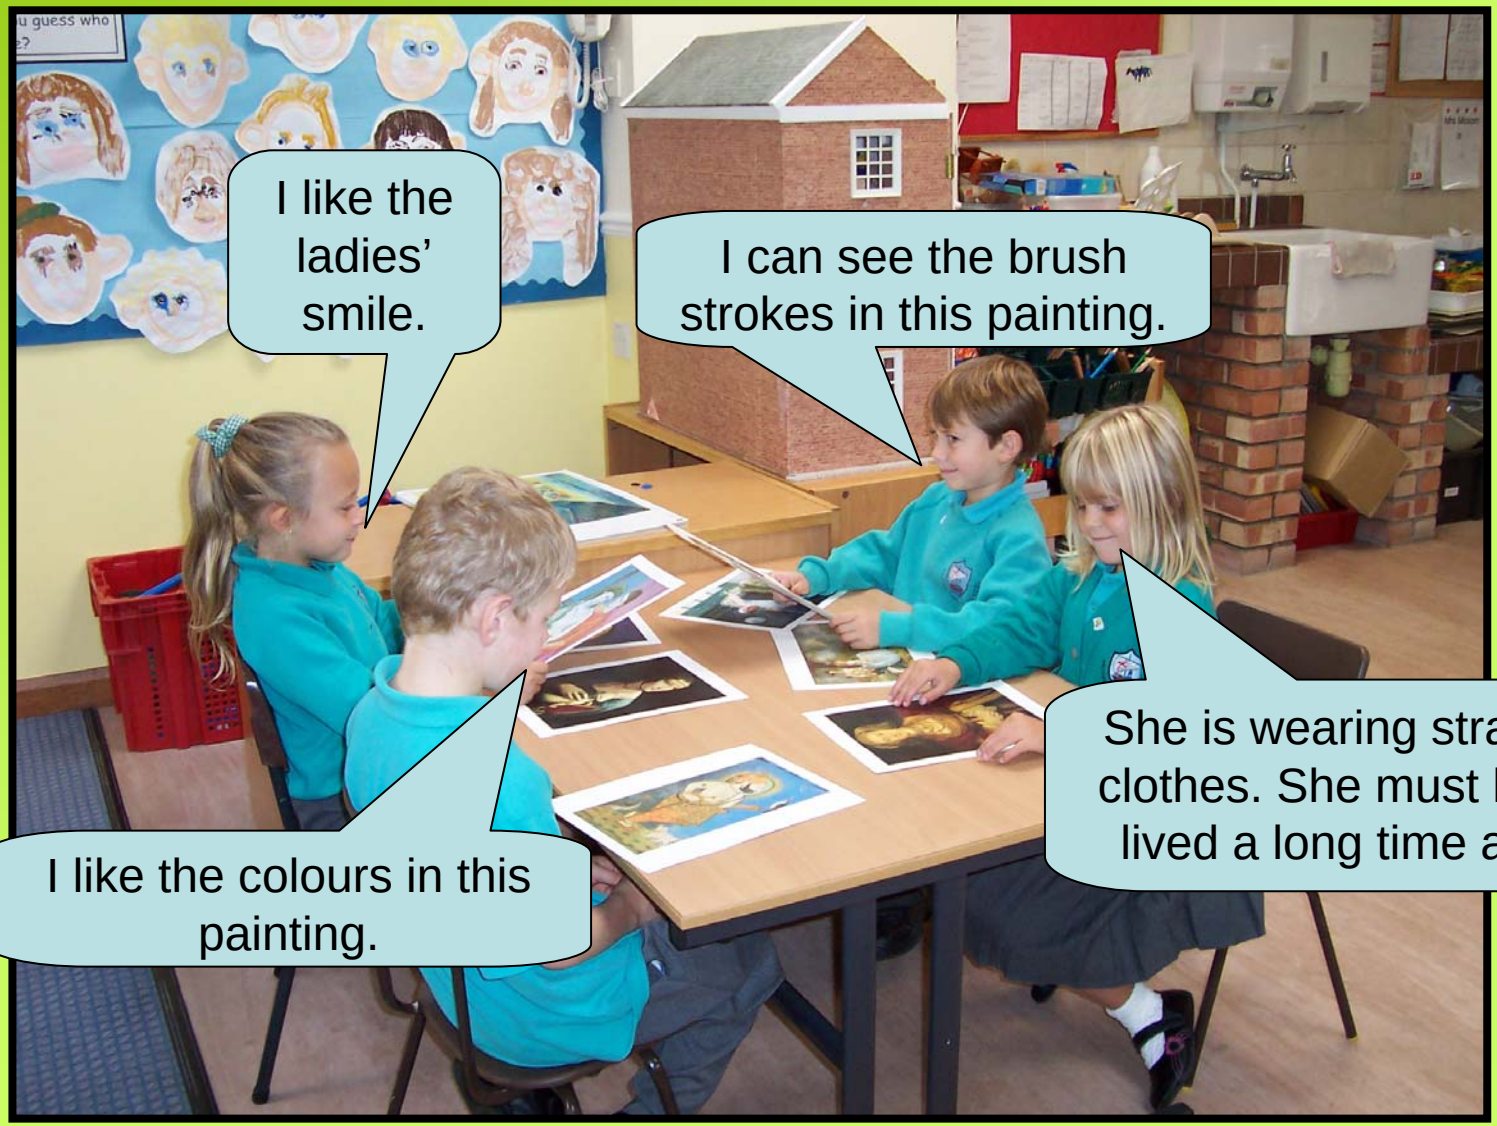
First we looked at some portraits that famous artists have painted.





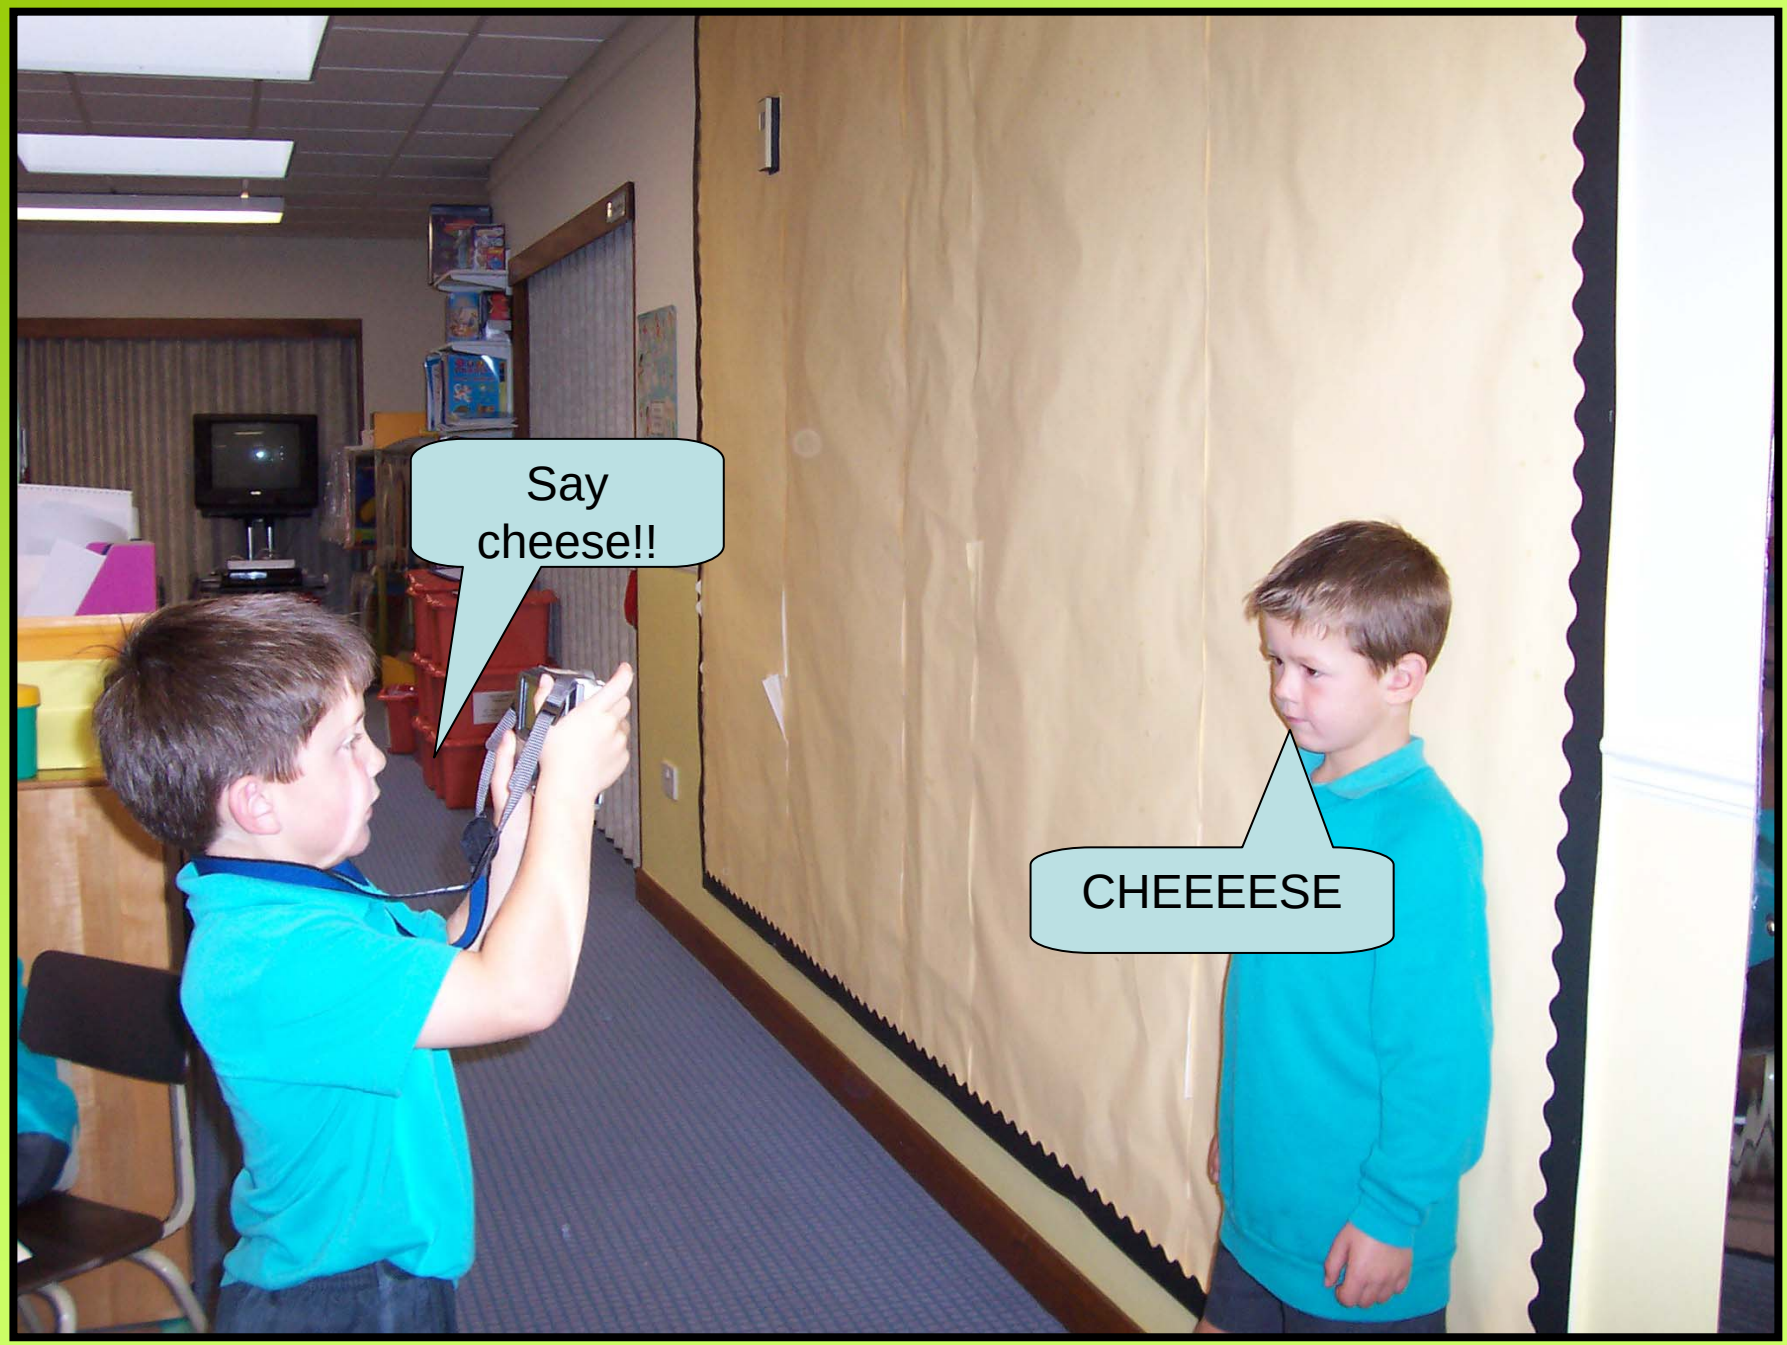
What is a portrait?

What did we think?

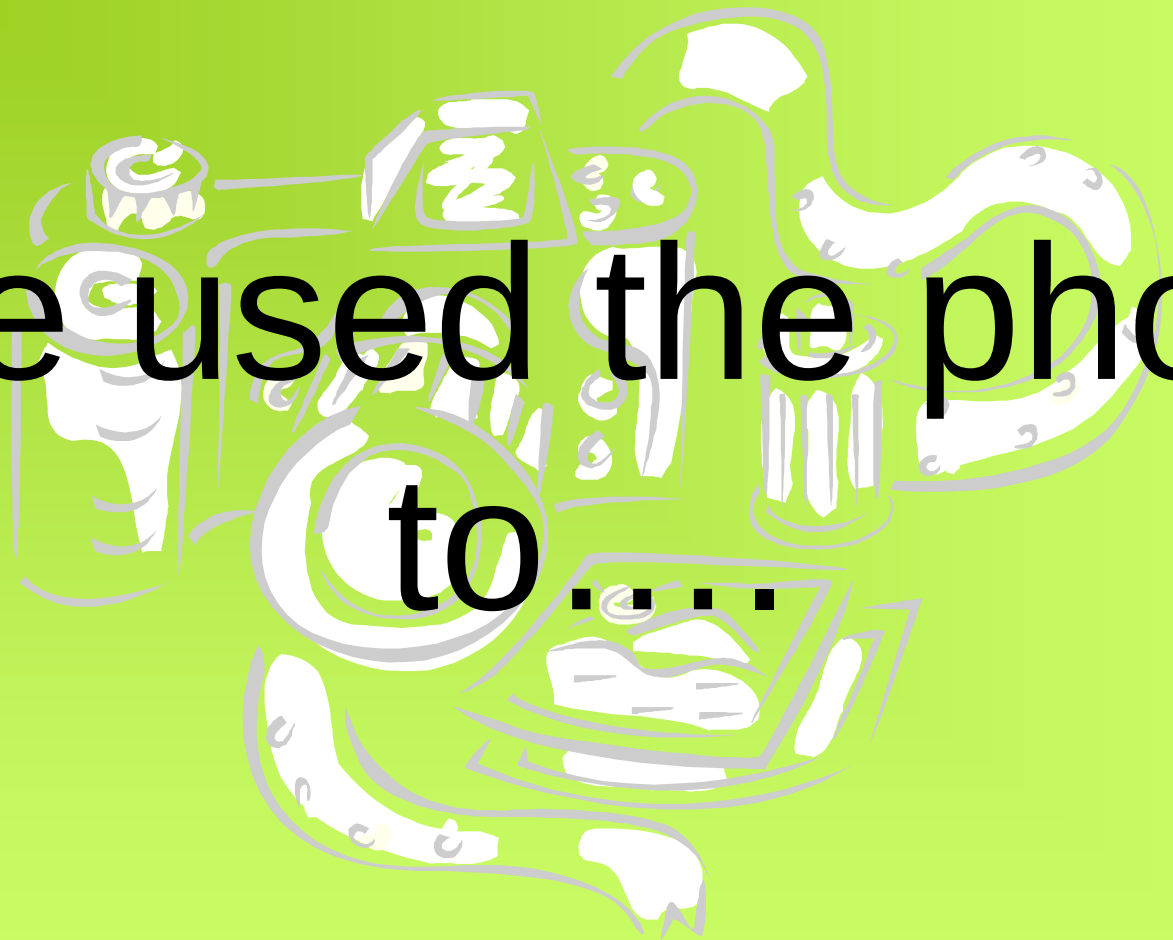


Then we took a photo of a friend using the digital camera, so that we could create our own self portraits.

Smile please.

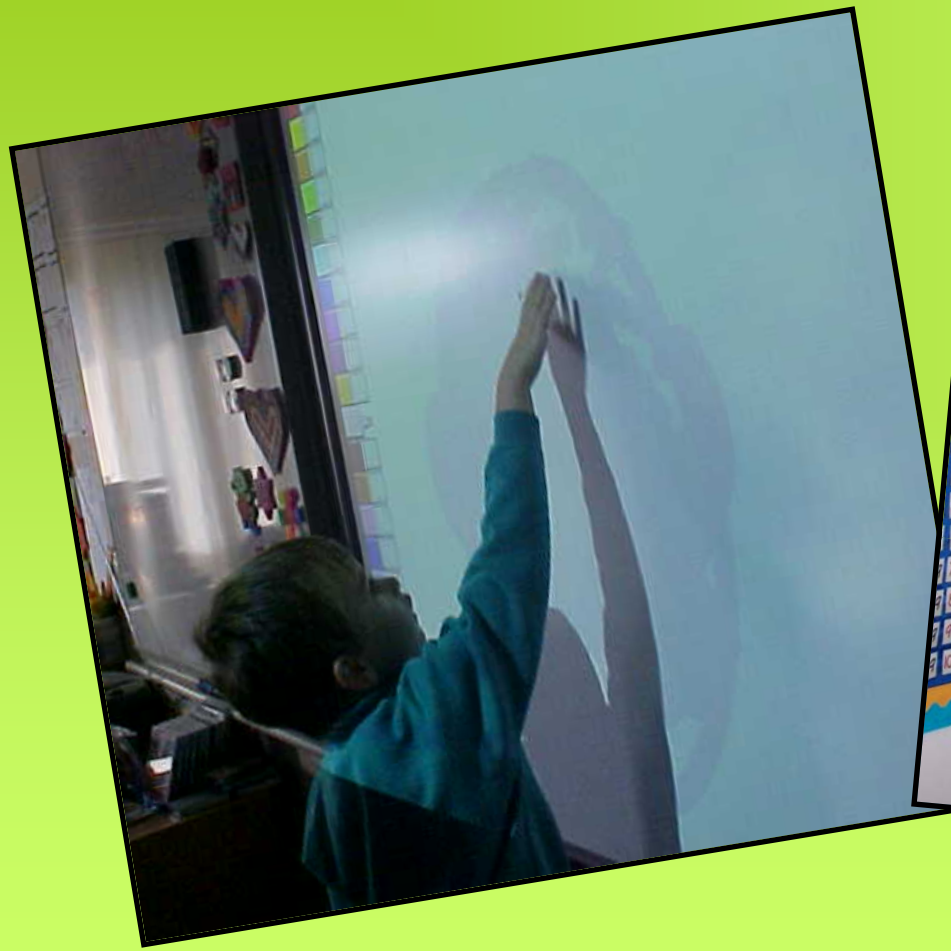


Say cheese!!
CHEEEESE



We used the photo to…

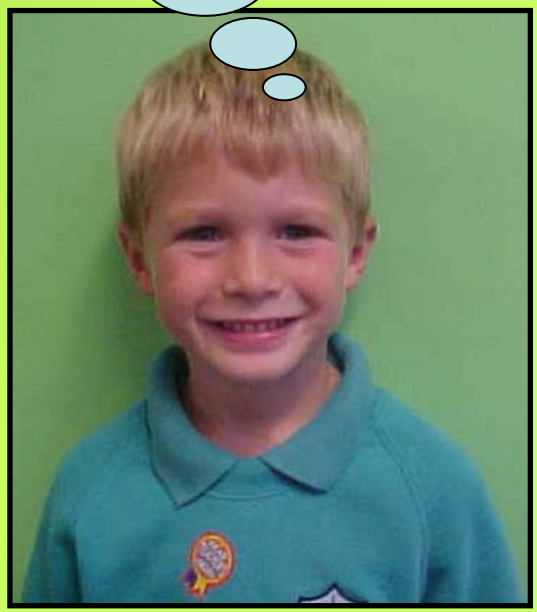
paint a self portrait using a painting program.



We used the smartboard.

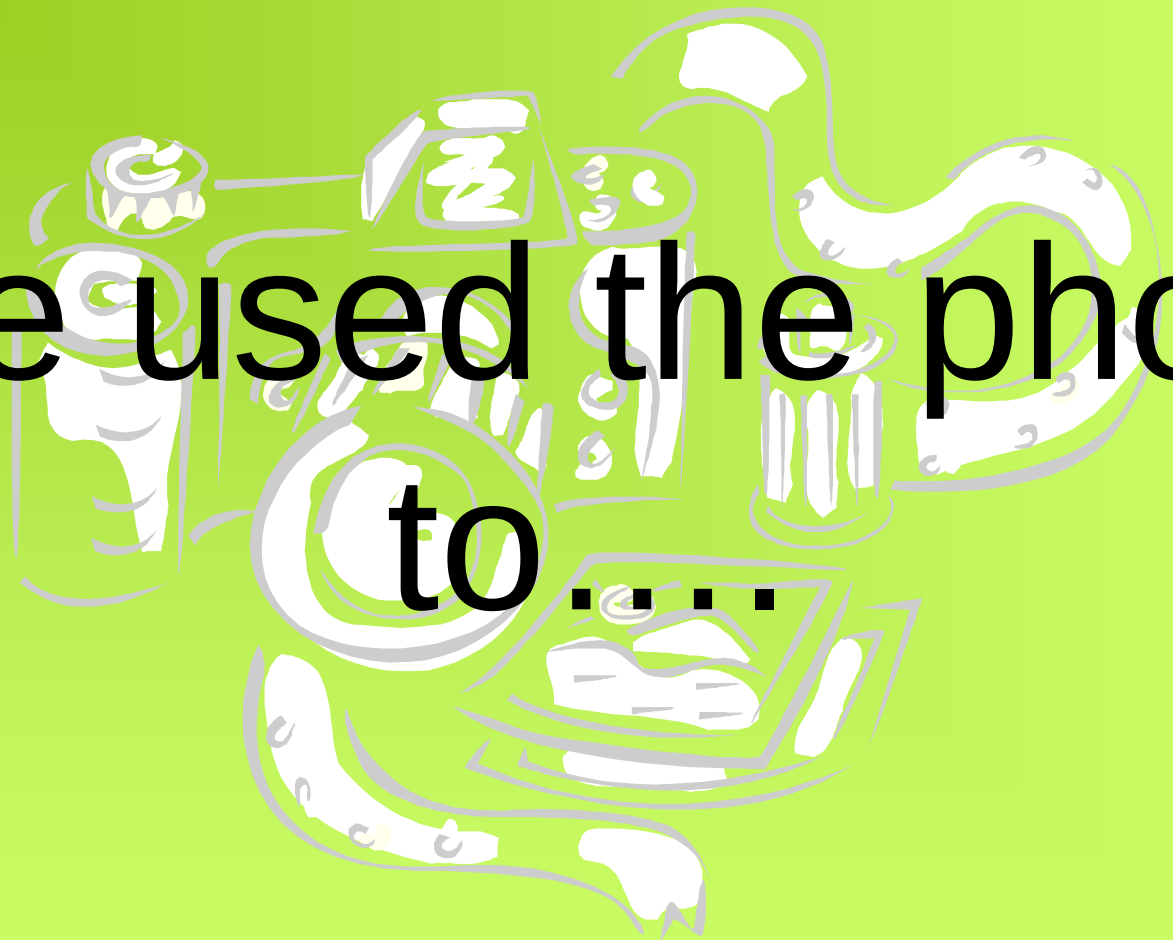
Here is my self portrait.

Does it look like me?



Here is my self portrait.

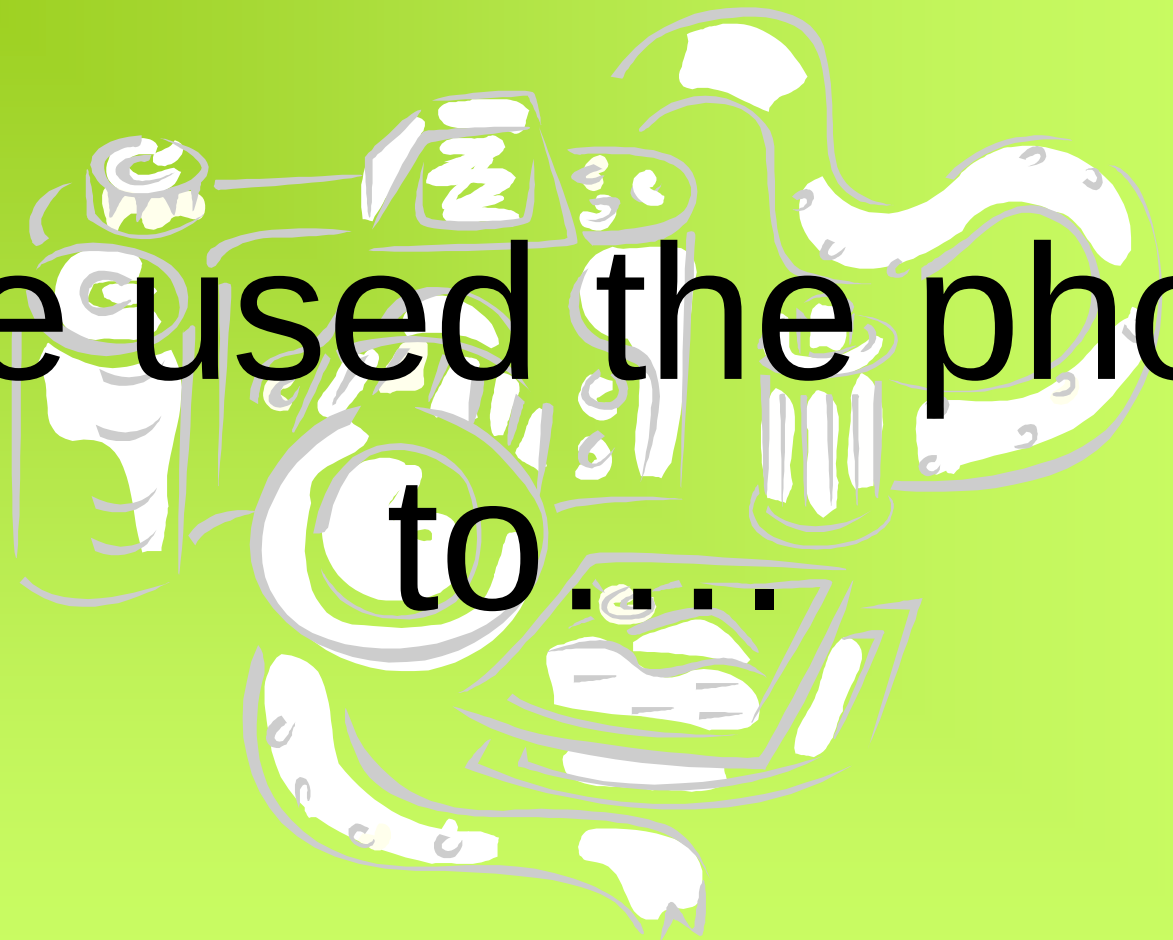
That kind of looks like me!



We used the photo to…

sketch self portraits in our sketch books.

Does the sketch look like us?



We used the photo to…

change the way we look by adding multi-coloured glasses!

We had a ‘guess who’ competition!

Do you know who is hiding behind the glasses?

What have we learned?

- We have learned about portraits that have been painted by famous artists.
- We have learned to take photos using the digital camera.
- We have learned to use art software to paint a self portrait.
- We have learned that we can change the way we look by using art software.
