## Management of

## e-learning

#### Management structure for e-learning

• Headteacher

Senior Manager in charge of e-learning

 $\bigcirc$ 

• ICT Coordinator.

• e-learning Steering Group

Staff

ICT management starts from the top
The Headteacher is closely involved in all processes and initiatives with regard to ICT.

 The Head teacher attends the Education Department e-learning steering group and then reports back to the e-learning steering group within school on matters discussed.

## Mr Hall

- E-learning manager, Part of the Senior Management Team
- A post created last year designed specifically to promote e-learning within the school.

#### Mr Adams

• ICT co-ordinator within the school in addition to being Head of ICT as a subject.

#### Dave Woodward

- Dave acts as our liaison with Ramesys/Itex. It is his responsibility to log calls and chase up responses.
- As he is the technician for D & T and not a teacher it does enable him to be more flexible in dealing with problems that arise.

## Itex/Ramesys

Managed service provider

#### **E-learning steering group**

• This is a forum for raising and implementing initiatives with regard to ICT for the whole school and wider community.

 It is attended by the Head teacher, Senior Manager in charge of e-learning, Member of staff in charge of whiteboards, Head of Science, Head of Business Studies and Head of ICT.

## ICT Update

• After each e-learning steering group meeting an ICT update sheet is created based upon the minutes of the meeting. This is distributed to all staff in order to inform them of ICT issues within the school and beyond.

#### 2004/5 Matters

 Last year was spent re-writing and evaluating the e-learning policy which has been designed to echo the School Development Plan and provides a vision and fourteen objectives to take the school up to 2008.

## 2005/6

 This year the plan states that we are aiming to integrate the SIMS package further by introducing (one school cohort at a time) the registration of pupils on-line via teacher laptops. This will reduce the administration burden on tutors and increase the accuracy of the reasons provided for absence.

#### 2005/6 Cont

• The plan also incorporates the tightly controlled roll out of e-mail to all pupils upon the receipt of a signed user agreement by both students and parents. This was implemented to stress the dangers in e-mail and to demonstrate how much control over the system the administrator has. (This was further reenforced by a demonstration during assembly.)

#### 2005/6 Cont

• The roll out of MyClasses (VLE) by a select group of MyDesktop "Champions" will also be launched this year. It is intended that five members of staff will take an area each and develop it over the coming year. One member will place all the Science lessons from the interactive whiteboard on the desktop for students that are absent so that they can catch up. Another will produce a handful of specific lessons utilising the facilities available on MyDesktop (notice boards, discussion forums, surveys, etc.)

#### 2005/6 Cont

• We intend to continue and further integrate the use of SIMS in regards to assessment. We are also investigating the use of "Gateway" to aid communication with home. In order to facilitate this we will need to further increase the use of mobile equipment for students.

# LES BEAUCAMPS

## **ICT** Resources at Les Beaucamps

## Music Computer Room

Special laboratory for creating digital music.
Special courses run by outside provider.

#### 4 Large ICT Suites and Laptop Trolley

## **Technology Suite**

• There is a large suite of computers in D & T with a number of machines connected to various Computer Aided Manufacture machines.

## Vision

- The overall vision is to facilitate good communication with all stakeholders in the school and promote anytime anywhere learning.
- This will be a costly undertaking and will require regular updating to ensure students are best prepared for the modern working environment.

## SIMS

 SIMS is currently used by all teaching staff to gather information about students and to monitor their progress. It has been used for basic contact information as well as finding out about previous grades and attendance information.

 Students can be filtered as a group or selective for certain lessons, e.g. Art.

#### Vision Statement

Les Beaucamps School provides students with a safe, supportive and caring learning environment - enabling all students to reach their full potential through the development of a desire for lifelong learning.

Les Beaucamps School envisages an environment where the use of ICT is regarded as an integral part of our everyday practices and administration management. It acknowledges the potential of e-learning to impact on learning outcomes for all students and the work habits of all staff.

e-learning encourages students and staff to assume greater responsibility for their own learning, in forums that develop their:

- Skills to become active and independent leaders
- Abilities to communicate, collaborate, plan, analyse and solve problems
- Skills to use new technologies, particularly ICT.

#### Vision Statement (cont)

The appropriate use of ICT develops our school's high quality teaching and learning, administration and management. elearning enhances student centred learning through the integrated and negotiated curriculum, guides discovery through learning experiences and encourages continuity across all areas of the curriculum.

Les Beaucamps School seeks to provide a dynamic and innovative environment, which will support "anytime", "anywhere" learning. It is the aim to put information at the forefront by providing it in a detailed and useful way via a medium which will be: always current and easily accessed.

#### Vision Statement (cont)

As a consequence of this vision the school's mission will be:

- to demand high levels of teaching competence for e-learning.
- to provide staff with support and assistance including the provision of relevant and stimulating professional development and training activities for e-learning.
- to maximise the use of resources.

#### Vision Statement (cont)

As a result of our e-learning Vision:

- Les Beaucamps School will develop and implement strategies to provide on line technologies and broaden access and competencies of staff and students.
- Les Beaucamps School will continually develop resources, skills, knowledge and understanding of e-learning technologies.
- Staff will be competent users of e-learning.
- Students will develop skills in the use of technology appropriate to their needs.
- The school (via states education) will continually upgrade resources.

All the above is to support the effective learning/e-learning in school which in turn should promote the focus on improving teaching and learning.

## **ICT Objectives**

- 1. Have information technology easily accessible to staff and students in order to raise standards of achievement.
- 2. Continue, for the time being, to teach IT skills within a discrete subject with a view to implementing a cross-curricular strategy when ICT is more fully integrated into all subjects areas.
- 3. Look to identify those students in key stage 3 / 4 who require help with ICT.
- 4. Have a better continuity between key stage 3 and 4.
- 5. Give colleagues the expertise and confidence to develop into an ICT literate staff to raise standards of teaching and learning.

## **ICT Objectives**

- 6. Assess new adaptive software assessment systems specifically for use in Learning Support and possible introduction to mainstream.
- 7. Further integrate the use of ICT equipment into existing tasks for staff and students.
- 8. Develop the use of SIMS (Managed Information System) further so that all administration tasks are centralised to facilitate the goal of information being easily accessible and always current. Specifically look to add cover and attendance modules by 2007.
- 9. Create a safe environment to protect users of the system by establishing and maintaining a code of practice which will become embedded in the culture of the school.

## **ICT Objectives**

- 10. Encourage the use of the VLE within lessons to develop a truly on line curriculum to facilitate "anytime", "anywhere" learning.
- 11. Investigate the possibilities of creating online CPD and development plans.
- 12. Develop staff skills in the use of interactive whiteboards to encourage greater access to the curriculum for all pupils.
- 13. Introduce the use of e-mail to all students for use in their own education.
- 14. Begin to develop the wider community by giving access to the parents through the MLE (Managed Learning Environment) so they can become well informed and participating members of the community.
