La Houguette Primary School

Enhancing children's learning through the use of ICT.

Using interactive whiteboards.

As teachers we recognise that:

- It is our role to facilitate the learning of ICT.

- We need to develop children's capability in ICT.

- ICT is highly motivational.

Interactive whiteboards.

- Our ICT co-ordinator has undertaken island wide training in the use of the interactive whiteboards.

- As a school we have had dedicated training sessions to enable us to become confident users of the boards.

- The children are also confident in their ability to use the smartboards.
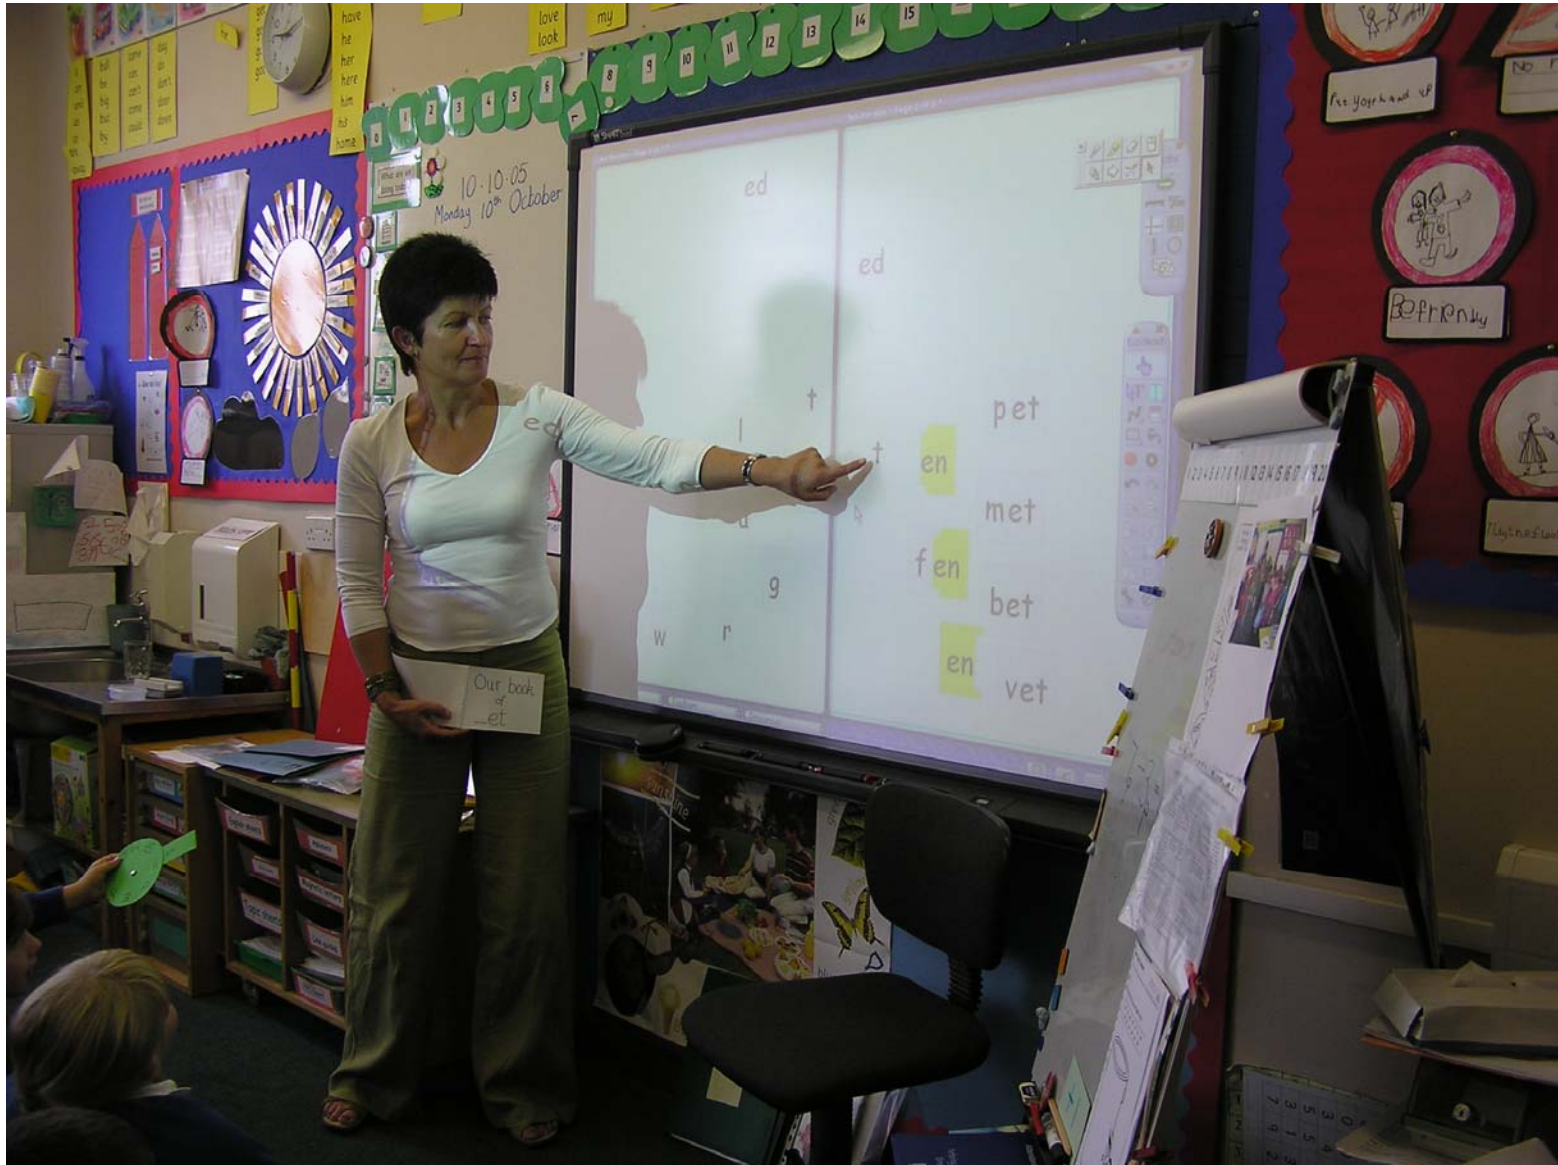

We use our interactive whiteboards in all our teaching.

Reception children learning to spell words using the board.

Teachers are keen to use the smartboard for cross-curricula purposes.

Year 1 children are learning about the sounds of words.

Year 2 are using an easiteach lesson.

Year 6 making use of their interactive whiteboard in Numeracy

At La Houguette Primary School we:

- Have a dedicated ICT suite for the teaching of ICT skills.

- Link ICT to other areas of the curriculum.

- Bring ICT into the classroom through the use of laptops.

Having a bank of computers in the work area enables children to work collaboratively.

Our bank of laptops enable us to bring ICT into the classroom. These are Year 4 children carrying out research on the internet.

Using the laptops encourages more independent learning. Year 6 children use the laptops to present poems.

Our dedicated ICT suite enables us to teach specific IT skills.

Year 3 using the ICT suite.

Teachers use ICT for their own professional development.

Children's ICT work is displayed in work areas.

All our library books are on computer. This enables the children to take books out of the library on their own.

Year 4 children use the library independently.
